EDUCATION

Dhanalakhmi Srinivasan Engineering College(Autonomous) , Perambalur

MONTH 2023 - MONTH 2027 ,
3rd year B.Tech in Artificial Intelligence and Data Science

SUMMARY

Motivated AI & Data Science student with a strong foundation in Machine Learning, Data Science, and programming. Skilled in Python, data analysis, and building predictive models, with a keen interest in solving real-world problems using data-driven approaches

PROJECT

College Admission Agent – Using Watson.ai

Developed an AI-powered college admission agent to assist students in selecting suitable colleges using watsonx.ai.

Implemented intelligent query handling and recommendation logic to guide applicants efficiently. Enhanced user experience through automation of admission-related responses and decision support.

SKILLS

- Artificial Intelligence
- Python Programming
- SQL Programming
- Java Programming
- Web developing

Agro version Mobile application

- AgroVision is an AI-powered smart farming mobile application designed to support farmers in making better decisions. It allows users to upload crop images to detect diseases using machine learning, while also providing real-time weather updates, soil health insights, and irrigation guidance. The platform integrates market price predictions to help farmers decide the best time to sell their produce. By combining multiple features into a single, easy-to-use app with voice support, AgroVision aims to reduce crop loss, improve productivity, and increase farmers' overall profitability.
